BORED LOCK FOR SCHOOL SECURITY SOLUTIONS
WITH DOUBLE-SIDED STATUS INDICATORS

The Only Dual Indicator Bored Lock on the Market

School Security Solutions - Security and Convenience, Inside and Out

- ☑ The only double-sided indicator bored lock on the market — the most cost-effective way to upgrade your classroom security
- ☑ Classroom safety and security lock with double-sided status indicators — easily integrates into school lockdown strategies and always allows for free egress, even while the outside lever remains locked
- ☑ Allows for the use of existing key system — cylinders stay in place
- ☑ Inside cylinder / thumb turn and outside cylinder change both inside and outside status indicators
- ☑ Retrofittable without voiding existing fire ratings and warranties — fits into any existing cylindrical lock prep, and requires minimal door prep work to install the lock
- ☑ Complete with heavy-duty stainless steel trim and 160° viewing indicators, this product is certified UL 10(C) 3 hour fire rated and is designed to meet industry standards
- ☑ US Patent No. 10604963

Benefits

- **Easy to Install:** fits into any standard 161 prep
- **Maximizes Safety:** Highly visible status indicators instantly show the state of the lock
- **Innovative and Easy to Use:** Simple, single motion from the inside or outside controls the status indicators on both sides of the lock
- **Intuitive:** Engraving on the escutcheon shows turning direction to lock the lock
- **Strong and Durable:** Heavy-duty stainless steel construction guarantees years of trouble-free service
- **Classic Look:** Beautiful, clean lines make this modern looking lock well-suited for any school setting
- **Reliable:** Mechanical lock that does not rely on electricity or batteries to operate, and will not fail due to dead batteries or a power outage
