

CE-R

GRADE 1 HEAVY DUTY CYLINDRICAL LOCK

**Commercial-grade
strength you can trust.**

Built for Heavy Use, Designed to Last.

The CE-R is a heavy-duty ANSI Grade 1 cylindrical lock engineered for busy commercial facilities and purpose-built for retrofit upgrades. It allows facilities to upgrade aging hardware without the cost and disruption of full-door replacements, giving schools, offices, and industrial spaces a smoother path to improved security. It features an enhanced internal spring mechanism that reduces lever sag and a low-projection rose that maintains a modern, polished look.

Features & Benefits

Engineered for Strength in Demanding Environments

- The CE-R meets the industry's highest benchmarks for safety and strength, delivering reliability and long-term performance for demanding environments like schools, universities, office buildings, industrial facilities, and more.
- Heavy-gauge mounting plates and roses add structural reinforcement for demanding applications.
- CE-R is the rigid body; CEC-R is the optional clutched lock body for added defense against abuse, preventing damage to internal components and extending the lock's service life.

A Smarter Internal Design

- An internal spring mechanism minimizes lever sag and extends overall product life, ensuring consistent, long-term performance with minimal maintenance.
- The low-projection rose provides a clean, modern aesthetic that fits seamlessly into new construction and retrofit applications.

Fast, Straightforward Installation

- Installs quickly in standard cylindrical lock preps with adjustable through-bolts, helping reduce installation time and labor costs.
- Compatible with Schlage® ND Series, Sargent® 10/10X, Corbin® CLX3300, PDQ® XGT, and Accentra (Yale)® 5400LN Door Templates.

Code-Compliant & Certified

- ANSI/BHMA A156.2 Grade 1 Certified, UL 10(C) 3-hour fire rated, and ADA compliant, meeting the highest standards for safety and accessibility.
