

# Aegis ESG

LARGE MESSAGE INDICATOR EXIT DEVICE TRIM

Aegis ESG in rim exit device format

Aegis ESG in surface vertical rod less bottom rod format

## **An exit solution that retrofits, elevates, and delivers.**

The Aegis ESG is a durable, high-visibility exit device trim designed to work seamlessly with many existing exit devices. Its double-sided status indicators make the exit device trim status instantly clear, while its versatile compatibility makes retrofitting fast and cost-effective. Built for high-traffic areas and easy operation, the ESG delivers reliable security without the need for a full replacement.

# Reliable Security Meets Seamless Retrofitting

## Features & Benefits

### Innovative Design

- The Aegis ESG features a first-of-its-kind double-sided indicator that clearly displays exit device status on both sides of the door for instant visual verification.
- Designed to work with many existing exit devices to reduce installation time and save costs.
- A simple motion on either side of the opening changes the message indicator on both sides of the door accordingly.
- Intended for use in high-traffic areas, including front entrances, offices, hospitals, classrooms, back exits, hallways, and school gymnasiums.
- The ESG's sleek design allows for a consistent look across all Aegis products, ensuring uniformity and familiarity throughout all openings in the facility.
- Durable stainless steel construction ensures lasting performance in demanding settings.

### Flexible Retrofit Compatibility

- The Aegis ESG exit device trim allows easy and affordable retrofitting on existing devices without having to purchase a new, complete exit device.
- Compatible with TownSteel 1100/1200/8900/9700 Series, Von Duprin® VD22/99 Series, Marks® M9900 Series, Hager® 4700 Series, Detex® 10 Series, Sargent® 8000 Series, Corbin Russwin® ED5000 Series, Dorma® 9000 Series, Precision® PHI 2000 Series, Falcon® 20 Series, Accentra® (Yale) 2100/6100/7100 Series.

### Multiple Format Options

- Can be used on either rim exit devices or surface vertical rod less bottom rod exit devices
- Available in multiple cylinder formats to meet different application needs across commercial, healthcare, and educational spaces. Refer to cut sheet for more details.
- Flat Black (622) or Satin Stainless Steel (630) finishes available, others available upon request.

### Code-Compliant & Certified

- ANSI/BHMA A156.3 Grade 1 Certified, UL 10(C) 3-Hour Fire Rated, and ADA Compliant, meeting the highest standards for safety and accessibility.

**Note:** TownSteel's Aegis ESG exit device lever trim is designed to only be used on exit devices without any dogging mechanism. If the device has dogging, please remove or disable the dogging mechanism prior to installing the ESG. Any party/person who decide to not remove or disable the dogging mechanism is acting on their own accord and is liable for the functionality of their opening.
