RL

Compatible with Schlage® L Series Template

RC

Compatible with Corbin® ML2000 Series Template

RM

Compatible with Marks® 5 Series and
Dorma® M9000 Series Template

Rejuvenator Mortise Chassis Series

TownSteel's Rejuvenator Mortise Chassis Series is a line of precision-engineered internal lock bodies designed to fit seamlessly into existing door cutouts from other major brands including Schlage®, Sargent®, Corbin®, Marks®, Dorma®, and Best®. These chassis form the core of the TownSteel Rejuvenator 2.0 Series, which offers a more convenient and cost-effective way to replace outdated or damaged mortise locks without any additional door modifications or sacrificing code compliance. By combining the interchangeable mortise chassis with a compatible escutcheon trim, the Rejuvenator 2.0 makes it easy to upgrade entire mortise locksets, saving time, labor, and money while maintaining ANSI/BHMA Grade 1 performance and ADA accessibility standards.

**Please note that the mortise chassis are not sold separately and must be paired with an appropriate trim.*

Features & Benefits

- **Retrofit Compatibility:** Fits into existing door preps from other major brands like Schlage®, Sargent®, Corbin®, Marks®, Dorma®, and Best® mortise locks without needing to modify the door.
- **Durable Construction:** Heavy-gauge stainless steel lock case and stainless steel components provide long-lasting and reliable performance in demanding environments.
- **Smooth Operation:** built with stainless steel anti-saw deadbolt with 1" projection, stainless steel anti-friction latch bolt with 3/4" projection, and stainless steel guard bolt for enhancing forced-entry resistance and low-resistance door function.
- **Simple Installation:** Field-reversible handing and includes ASA strike, faceplate, and mounting screws.
- **Multiple Functions Available:** Supports 17 ANSI functions, including privacy, passage, entry, and institutional.
- **Standardized Backset:** 2-3/4" backset aligns with common commercial door requirements.
- **Trusted Finishes:** Available in Flat Black (622), Satin Chrome (626), and Satin Stainless Steel (630); other finishes available upon request (Note: these finishes are available to match the screws and faceplate of the chassis, but the options are dependent on which trim you choose and the specific finishes available for that trim).
- **Code-Compliant:** ANSI/BHMA A156.13 Grade 1 Certified, UL 10(C) 3-Hour Fire Rated, ADA Compliant and meets Buy American Act (BAA) Requirements.

Mortise Series	Door Prep Equivalent
RM	Marks® 5 Series & Dorma® M9000 series
RC	Corbin® ML2000 Series
MS	TownSteel® MSE series & Best® 35 / 45 Series
RS	Sargent® 8200 Series
RL	Schlage® L Series
