

## 1000 Series Exit Device with Indicator

---

Certain applications may be required by code to have an exit device in the rooms' egress plan. Our 1000 series exit device offers an indicator on the inside of the device for easy viewing of the exit device's status.

- Convenient visual aid allows people inside the room to quickly determine the device's status.
- When locked the device always provides free access to those in the room.
- Indicator is available in two convenient options, a key operated cylinder, or a thumb turn.
- Durable construction makes the 1000 series perfect for new or retrofit applications and is perfect for use in schools.

## TDC 40 Door Closer

---

Door closers play a vital role in securing an opening by controlling the door hung in the opening. Closing speed and closing force are the two main activities a door closer performs. The TDC 40 manages these activities flawlessly.

- Designed for consistent, reliable performance in high traffic areas.
- Heavy-duty cast-iron body provides years of trouble-free performance.
- Precision rack and pinion construction with adjustable spring power.
- Includes separate, adjustable latch, sweep, and backcheck valves.
- Available in multiple mounting arrangements.

## Aegis LIC-SLM Bored Lock with Indicator

TownSteel's new Aegis Bored Lock is designed for new construction or retrofit projects and includes a large message indicator on the inside and the outside escutcheons.

- Heavy-duty stainless-steel escutcheon
- ANSI / BHMA A156.2 Grade 1 certified
- Certified 3-hour UL10(C) fire-rating
- Allows for existing cylinders to be used so you won't have to re-key any locks
- Key on the outside controls both indicators as does a key or thumb turn on the inside.
- Large message indicators are easy to see during an active shooter situation

## Aegis MSE-LM Mortise Lock with Indicator

The Aegis Mortise Lock is a great solution for school safety; it boasts a heavy-duty large escutcheon that's reliable and compatible with major brands such as Schlage® L series, Sargent® 8200 series, Corbin® ML2000 series, Best® 35 and 45 series, Marks® 5 series, PDQ® MR series, and Dorma® M9000 series.

- Heavy-duty, standalone mortise lock compatible with our Rejuvenator™ mortise models
- Large message indicator is easy to see during an active shooter situation
- 3 available indicator labels (Unlocked / Locked, Vacant / Occupied, Secured / Unsecured)
- Various cylinder and keying options
- Standard stainless-steel finish
